

My comment is that our media needs to present diverse points of view and when one conglomerate or political or religious group dominates the media than government intervention is required. America minds are all ready much controlled by Madison Avenue advertising. Our young people do not see diverse view on mainline TV. And Radio is still so much the same. We must encourage all segments of society to have a chance to own the media. Groups with large asset bases must not dominate American thought. To buy support is not an American founding principal. Neither might makes right nor money makes right was encouraged by the founding fathers. Rather let all be heard and all persons rights be respected and supported.
